Important Notice: Windows 10 Support Ending October 14, 2025 — Upgrade Now!

Dear Valued Customers,

I would like to info you that Microsoft will officially **end support for Windows 10 on October 14, 2025**. After this date, Windows 10 will no longer receive security updates or technical support, exposing your system to potential risks and compatibility issues.

What Does This Mean?

This means you will not get any of the following.

No More Security Updates
After this date, Windows 10 will no longer receive security updates or patches. This increases the risk of viruses, malware, and other cyber threats.

No Technical or Compatibility Support
Microsoft will no longer offer technical support or ensure compatibility with new software and devices, which

Windows 10

could affect your system's performance and usability.

Higher Risk Over Time
While your PC may still operate, continuing to use Windows 10 past the support deadline leaves you open to serious security and reliability risks.

Can Your PC Run Windows 11?
Many older computers won't meet the minimum hardware requirements for Windows 11, which include:

- Compatible 8th Gen Intel or 2nd Gen AMD Ryzen processor (or newer)

- TPM 2.0 and Secure Boot enabled

- At least 4 GB RAM and 64 GB storage

If your PC is over 5 years old, it's likely time to upgrade to a new system that supports Windows 11. But in some cases we might be able to offer you an upgrade solution

Upgrade Solutions

There are many ways that we can help you with your upgrade to Windows 11.

1. Check the system for hardware upgrades to take Windows 11.

2. Perform a software check to see if the system can take Windows 11.

3. Bypass the security setting so that some older systems can take Windows 11.

4. If all fails then I will recommend some new systems in the next section that will take Windows 11 at a reasonable price.

Bronze Package to Windows 11

Bronze Package —
Ideal for everyday tasks

- Case - ANTEC VSK-3000B-U3/U2 Case,

- CPU - Intel Core i3 14100 4 Core Processor 8 Threads

- Motherboard - Gigabyte H610M K DDR4 Ultra Durable Intel 17

- Memory - Netac 8GB No Heatsink (1 x 8GB) DDR4 3200MHz DIM

- Primary Hard Drive - NETAC NV2000 (NT01NV2000-256-E4X) 256

Custom PC Offers – Starting Prices and Build Time Information

If you're in the market for a custom-built PC, our current offers are an excellent place to start. We provide a range of affordable and high-performance systems tailored to suit your specific needs—whether you're a gamer, creative professional, or need a reliable machine for everyday tasks.

Starting Prices

Our custom PC builds begin at competitive starting prices designed to give you great value for money without compromising on quality. These entry-level configurations provide a solid foundation, with the flexibility to upgrade components to match your preferences and requirements. Each system can be fully customized to include the latest processors, graphics cards, memory, and storage options.

Build and Supply Time

To ensure every PC meets our quality standards, we allow a **build and supply time of approximately 2 working days**. This time frame covers:

- Ordering and receiving selected components (if not in stock)

- Assembling your custom system with care and precision

- Conducting full testing and quality assurance checks

We understand the importance of timely delivery and strive to keep our turnaround time efficient without sacrificing attention to detail.

Why Choose Us?

- **Tailored to You** – Each build is unique and crafted to your needs.

- **Expert Assembly** – 19+ years of technical experience in PC building.

- **Ongoing Support** – We provide guidance and after-sales support to ensure satisfaction.

If you're ready to explore your options or would like help selecting the right configuration, feel free to get in touch. Your next custom PC is just a couple of days away from becoming a reality.

Same trusted service. New name.
Still local.

STRESS FREE PC'S
— Computer help made simple!

Former Megabytes Computers customer?
You're in the right place!
After Megabytes closed, *Stress Free PC's* was created to keep offering the same trusted support you've relied on for years.

☑PC & Laptop Repairs
☑Virus Removal & Protection
☑Software Help & Upgrades
☑Clear, Friendly Advice

With 19+ years of experience, I provide honest, reliable tech support — without the stress.

— Local. Professional. Friendly.
— Get in touch today for help you can count on.

The Story Behind Stress Free PC's

When *Megabytes Computer Services* closed its doors in August 2025, it marked the end of an era. For years, the business had been a trusted name in the community — a place people could turn to for honest advice, dependable repairs, and a friendly face when technology went wrong. As one of the engineers behind that support, I had the privilege of helping countless customers — many of whom became more like friends.

But with Megabytes gone, I knew there would be a void — especially for those who relied on personal, local service instead of big-box stores or online helplines. That's when I made the decision to step up and carry that support forward in a new way.

Stress Free PC's was born out of a desire to keep that connection alive.

Drawing on 19 years of experience in computer engineering — and a lifetime passion for computing that started back in the days of the ZX Spectrum and Commodore Amiga — I set out to create a service that's not just technically skilled, but *people-first*. I wanted to strip away the stress and confusion that so often comes with tech problems and offer clear, down-to-earth help for everyday users.

Whether you're struggling with a slow PC, setting up a new device, or just not sure what you need, *Stress Free PC's* is here to make things simple. I don't believe in talking over

people's heads or pushing unnecessary services — just honest advice and reliable solutions tailored to you.

This isn't just a job to me — it's a way of continuing to serve the community that's supported me for so many years. So if you were once a Megabytes customer, or you're just looking for someone local you can trust, I'd love to help.

Thanks for being part of this new chapter. Let's make technology stress-free — together.

Anthony Rhodes & Andrew Hack
